

WT003 is a *wet inlay* made of PET, a material featuring flexibility and resistance to cuts and thermal shocks. Rectangular in shape, it is adhesive and flexible, and **measures 64 mm x 6 mm**.

It has a transparent surface, is applied using an adhesive and is **suitable for non-metal materials**. WT003 is available in **UHF with the UCODE 8 chip** in both European and US frequencies.

#### MARKETS

WT003 is designed for **retail, supply-chain, industrial, logistics and waste-collection applications**.

European frequency (EU) 868 MHz - US frequency 920 MHz

RFID features

Chip	Memory	ISO Standard
UCODE 8	0 bytes - TID: 12 bytes - EPC: 16 bytes	EPC Class 1 Gen 2
UCODE 8 US	0 bytes - TID: 12 bytes - EPC: 16 bytes	EPC Class 1 Gen 2

Technical specifications

Application	Non-metal surfaces
Dimensions	64 x 6 mm
Material	PET
Application method	Adhesive

Customisation

Colour	Transparent
