

KF003 is an RFID key fob made of ABS, a thermoplastic material with excellent mechanical properties such as good rigidity and hardness, impact resistance and water resistance.

With a metal ring and teardrop shape, it can be customised using screen and pad printing, while serial numbering can be applied using laser technology.

KF003 is available in **LF, HF and**

combo (LF+HF) frequencies, in the following colours: blue, black, green, grey, yellow.

MARKETS

It has an **IP64** protection rating and is ideal for **access control** in several RFID applications, including **detecting the number of people present at a site, identification, ticketing, electronic wallets and public transport.**

frequency 125 KHz
