

DESCRIPTION

PT08 is a keyfob made of PA6, a plastic material with excellent mechanical characteristics, resistant to traction and compression, even at low temperatures.

Ideal for asset management, access control and security operations, it is also suitable for industrial automation and Fashion traceability. It measures 45x30x2.2 mm, it's available in different colours and it can be customized with silkscreen color printing and laser numbering.

IP68

UHF

RFID FEATURES

Frequency	866-868 Mhz
Chip	
IC type	Impinij R6-P
Memory	96 Bytes
User	
Standard protocol	ISO 18000-63 & EPC global Gen2v2
Reading distance	Up to 30 cm (dependent upon the reader)

PHISICAL FEATURES

Size (mm)	45x30x2.2
Weight (g)	0.3
Material housing	PA6
Attachment	Cord

ENVIRONMENTAL FEATURES

Operating temperature	-25° C to +50° C
Storage temperature	-25° C to +85° C

CUSTOMIZATION

Printing	Silkscreen color print and laser numbering
Colour	White, yellow, orange, red, green, blue, black
